Training Purpose

1. To develop the behavioral health capacity of participants through the learning and implementation of effective behavioral health models and techniques related to HIV/AIDS in American Indian and Alaska Native populations.
2. To instruct participants on effective methods of linking community members to critical HIV/AIDS-related services and resources.

Target Audience

Behavioral health providers, health care providers, community health workers, and others who provide behavioral health and HIV/AIDS-related services to American Indians and Alaska Natives
